

Flex-Guard Split Loom

Flex-Guard Split Loom is black, durable polyethylene material split lengthwise. Split loom holds groups of wires in position and gives the wire excellent protection against abrasion and crushing. Remains tightly closed even when bent or twisted. Highly resistant to temperatures up to 200°F/93.33°C. Bulk quantities also available.

Polyolefin Dual Wall Heat Shrink Tubing w/ Adhesive Assort. Kit

Crosslinked Polyolefin heat shrinkable tubing with an internal meltable sealant. When heated above 120°C the tubing will shrink to approximately 33% of its original diameter. As it shrinks, the internal sealant melts and provides a moisture-proof seal for wires, splices, breakouts and components. This tubing is especially of value for applications needing a moisture barrier in high humidity and corrosive environments.

This assortment contains 24 pieces 6" in length of our most popular sizes of Dual Wall Heat Shrink With Adhesive, in our transparent impact resistant box.

Part No. STKPOD-24

**24 Piece Assortment
Kit in Poly
Compartment Box**

Heat Shrink Gun

HST10 is UL and CSA Approved. Rated 110V, 60HZ, 750W and 1500W power, blowing speed 280/4801/min. 300°F (149°C) and 500°F (260°C). Also comes with several attachments to make the job easier and faster. Handy storage and carrying case.

Part No. HST10

Heat Shrink Gun

10 AMP Flameless electric heat tool with solid state construction. Ideal for shrinking our line of heat shrinkable tubing and terminals.

Professional Grade All Weather PVC Electrical Tape

**NEW
PRODUCT**

Our Professional Grade Electrical Tape is a premium all weather tape. It is conformable for cold weather applications from 8° F (-18° C) and continuous temperatures up to 220° F (105° C). It easily conforms to irregular surfaces for moisture tight electrical protection.

Part No. PGPT60

**Professional Grade PVC
Electrical Insulation
Tape – Black only**

U.L. Listed Electrical Tape

A quality imported electrical tape made of soft polyvinyl, 7 mils thick. It has a dielectric strength of 8,000 volts per thickness. This soft flexible tape readily conforms to the contour of wire or loom with 175% elongation and has excellent adhesive qualities in all weather. Tape rated 17 lbs. tensile strength, labeled and cellophane wrapped. Rated up to 600 volts and maximum temperature 176° F (80° C). Assorted colors.

Plastic Storage Boxes

Mize Wire storage boxes are ideal for quality products which benefit by visible display. Polypropylene has long been the choice for literally hundreds of storage applications such as: automotive items, bolts & nuts, washers, office supplies and sportsman accessories. These boxes are transparent, for easy identification.

Metal Storage Boxes

These metal storage boxes are manufactured of prime cold rolled steel and finished in baked enamel, resistant to rust and acid. Compartments are of high impact plastic inserts. The inserts have rounded scoop, making it easy to remove small parts. BX21 also has a handle with a pull down latch to prevent spillage of items inside.
